HOW-TO
Input your base, bonus and global values in the upper table. You can get the values by comparing your stats with another player.
The final values will be automatically calculated.
Please note that, since some base and bonus values shown in game may be truncated (especially for HP/ATK/DEF),
the final calculated values may differ slightly from those in game.

In the lower table, you can input a positive or negative value for base, bonus and/or global and check how your stats will change.
For example, if you want to check how much your ATK will increase by getting an artifact, you can input 10% global ATK value
in the lower table. Same if you want to rebalance souls or awakening.
